

VALTRIX Quality & Manufacturing Capability

VALTRIX is a precision manufacturer of high-purity fluid control components for semiconductor, biopharmaceutical, LED/display, solar and hydrogen industries.

Manufacturing: CNC machining, electro-polishing, ultrasonic cleaning, ISO Class 4/5 cleanroom assembly, double-bagged packaging.

Quality: ISO 9001 quality management system; 100% helium mass spectrometer leak testing (to 1×10^{-10} scc/s); surface roughness measurement; full material traceability with mill certificates.

Engineering: in-house design and prototyping; OEM/ODM capability for custom manifolds, panels and assemblies; STEP 3D models available on request.

Capability	Detail
Cleanroom	ISO Class 4/5 assembly & packaging
Leak test	He MSLD, $\leq 1 \times 10^{-9}$ scc/s (100%)
Material	316L / VIM-VAR 316L SS
Standards	ISO 9001, SEMI-compliant products
