

VALTRIX VCR Face Seal Fittings Guide

G-series VCR face seal fittings provide metal-to-metal, elastomer-free connections for ultra-high-purity gas systems. A metal gasket is compressed between two conically faced glands to form a leak-tight seal rated for high temperature bake-out.

Available configurations: male/female nuts, glands, gaskets, reducers, tees, crosses, elbows and weld adapters, sizes 1/4" to 3/4".

Material: 316L stainless steel (VIM-VAR optional). Surface: standard or electro-polished ($R_a \leq 0.25 \mu\text{m}$).

Leak test: 100% helium mass spectrometer, $\leq 1 \times 10^{-9}$ scc/s He.

Packaging: ISO Class 4/5 cleanroom cleaned, double-bagged with desiccant and lot traceability label.

Series	Description
G Series	Standard VCR face seal fittings, 316L
G-GR	Glands for VCR connections
G-NUT / G-FNUT	Male / female nuts
G-GSK	Metal gaskets (silver-plated optional)
Weld adapters	Tube weld adapters for orbital welding
